Program notes:

The MediaEval 2011 working notes proceedings are delivered on a memory stick shaped like a key (*clef* in French) to remind us of our heritage in CLEF (Cross Language Evaluation Form). MediaEval was founded by Martha Larson (Delft University of Technology) and Gareth Jones (Dublin City University) in 2008 as VideoCLEF. It ran as a CLEF track in 2008 and 2009 and in 2010 became an independent benchmark initiative called "MediaEval".

The Proceedings Chair for MediaEval 2011 is: Sebastian Schmiedeke (TU Berlin, Germany). The 2011 proceedings are available online after the workshop. ISBN numbers for MediaEval 2010 and 2011 are pending.

MediaEval 2011 is coordinated by the EU FP7 PetaMedia Network of Excellence and also by the ICT Labs of EIT. MediaEval is made possible by a collaborative effort of all the other organizations and projects that contribute by organizing tasks.

Thank you for participating in MediaEval 2011. The benchmark is made possible by the efforts of many individuals and we appreciate the contributions of each one. We look forward to seeing you again next year.
